

Helping people

A REALLY important way to keep yourself safe AND help other people is to NOT spread germs! We make sure we are germ free by staying home and not going out! This is an important poster! *What should it look like?*

Stay HOME!

And we will stop the spread of germs!

This poster can be hung on the outside of your front door

We can't shake hands because of germs right now..

YOU can invent a NEW way to say hello instead!

Is it a wave? a nose pinch? a weird dance? It can change daily!

Whatever it is, remember, you **cannot** touch the other person!

Now *MAKE A POSTER* for it!

Say "Hello" the **NEW**
Way!

Cut out your poster and put it up in your house!

One way to stay safe is to keep 6 feet away from people
who do not live in your house with you!

Make a poster showing the "6 feet rule"!

Remember to follow The

'6 FOOT RULE'

"Social Distance!"

..and Stay Safe!

· Cut out your poster and put it in your house!
